The series offers an interdisciplinary platform for original peer-reviewed publications on the institutions, norms and practices associated with Globalisation, Multilateralism and the European Union. Each published volume delves into a given dynamic shaping either the global-regional nexus or the role of the EU therein. It offers original insights into: globalisation and its associated governance challenges; the changing forms of multilateral cooperation and the role of transnational networks; the impact of new global powers and the corollary multipolar order; the lessons born from comparative regionalism and interregional partnerships; as well as the distinctive instruments the EU mobilises in its foreign policies and external relations.
